

Online Privacy Concerns and the Teenage Perspective

Toby Theodros, Aadit Gupta

Advisor: Dr. Oshrat Ayalon

Agenda

1.

Introduction/Lit Review

2.

Research Questions

3.

Survey Development

4.

Current/Future Work

5.

Challenges/Limitations

Who here has used social media?

Who here has felt like their private
information is not protected on social
media?

Background

- Stigma around use of social media at young ages
- Why Teens?
- The pandemic brought a 45% increase in our time spent online compared to before Covid-19.
- 46% of U.S. Teenagers have been affected by cyberbullying from 2020-2021.

Cyberbullying Statistics & Facts for 2023

Manuel, et al.

Importance of the Topic

- 32% of online teenagers have been contacted online by complete strangers.
- 23% of teens who have been contacted by a stranger online say they felt scared or uncomfortable because of the online encounter.
- 21% of teens who have been contacted by strangers have engaged an online stranger to find out more information about that person.

Teens, Privacy and Online Social Networks

Lenhart, et al.

A decorative graphic at the top of the slide. It features four parallel diagonal stripes in a dark teal color on the left side, followed by a large, solid, light beige triangle that points towards the right.

Literature Review

Research Strategies

- **Social Media, Privacy Scales, Teens using technology**
 - Social Media: Websites and applications that enable users to create and share content or to participate in social interactions
 - Privacy Scales: A measurement or assessment tool used to gauge an individual's perception or level of privacy in a given context.
- Categorize different research constructs within the questions in papers
 - Construct: A conceptual term that encompasses an area of knowledge, developed to help understand or explain behaviors/phenomena within research
- **Question Construct Diagram**, which made visually aware the differences in scales for adults vs. for teens

Literature Breakdown

1.

Privacy Scales in general

- I feel confident learning skills to protect my privacy on the Internet.
Youn, et al.
- I read the privacy statement provided by the site.
Youn, et al.
- I go to other Web sites that do not ask my personal information
Youn, et al.
- I believe that my information privacy is invaded when control is lost or
unwillingly reduced.
Anaraky, et al.
- I have the right to exercise control and autonomy over decisions
about.
Anaraky, et al.

2.

Privacy scale in social media

- I control who sees the tag suggestions when photos that look like me are uploaded.
Anaraky, et al.
- It bothers me if my friends on Facebook/WeChat reveal the personal information I shared on Facebook/WeChat to others.
Anaraky, et al.
- I mind when an app that i visit collects information about my browsing history.
Brande, et al.

3.

Teen privacy scale on social media

- I want to share only minimal information about myself on Facebook.
Wiśniewski, et al.
- I want to be able to choose what to share and what to hold back on Facebook.
Wiśniewski, et al.
- I do not want to have Facebook friends who are no longer real friends.
Wiśniewski, et al.
- Companies should take more steps to make sure that the personal information in their files is accurate.
Burke, et al.
- Companies should have better procedures to correct errors in personal information.
Burke, et al.

Construct	Construct Factor	Associated Questions	Notes on Item
older teens' attitudes toward online privacy, attitudes toward online safety?	privacy concern	"I don't worry about privacy stuff, because I don't have anything to hide"	This paper didn't write the questions but gave direct quote from participants, helping us understand type of question asked
older teens' attitudes toward online privacy, attitudes toward online safety?		"The only way for real privacy on the internet is to not post, because in a way everyone can find it somehow	This paper didn't write the questions but gave direct quote from participants, helping us understand type of question asked
older teens' attitudes toward online privacy, attitudes toward online safety?		Discomfort with the idea of unintended audiences accessing or capturing personal data and information.	This paper didn't write the questions but gave direct quote from participants, helping us understand type of question asked
older teens' attitudes toward online privacy, attitudes toward online safety?		discomfort in using computers in their school libraries, as all activities were viewable by library staff on carbon copy screens in the library office	This paper didn't write the questions but gave direct quote from participants, helping us understand type of question asked
older teens' attitudes toward online privacy, attitudes toward online safety?		Disscomfort with employers viewing your social media account	This paper didn't write the questions but gave direct quote from participants, helping us understand type of question asked
older teens' attitudes toward online privacy, attitudes toward online safety?		Desire to gain popularity and acceptance from friends	This paper didn't write the questions but gave direct quote from participants, helping us understand type of question asked
older teens' attitudes toward online privacy, attitudes toward online safety?		How often when you post something do you consider who's going to see it	This paper didn't write the questions but gave direct quote from participants, helping us understand type of question asked
older teens' attitudes toward online privacy, attitudes toward online safety?		Do you always feel that you're secure online?	This paper didn't write the questions but gave direct quote from participants, helping us understand type of question asked
older teens' attitudes toward online privacy, attitudes toward online safety?		Does it bother you how much Facebook knows about you	This paper didn't write the questions but gave direct quote from participants, helping us understand type of question asked
older teens' attitudes toward online privacy, attitudes toward online safety?		Have you met any people you described as creepy on social media	This paper didn't write the questions but gave direct quote from participants, helping us understand type of question asked

Gaps in Literature

- Privacy scales' dimensions were mostly developed with adults.
- Consequently, teenage users' unique concerns and experiences were possibly overlooked in quantitative work.
- Privacy-related scales with teens explore relatively general context or privacy management practices.

Research Questions

- i. How do privacy concerns differ across various social media functionalities that are common across multiple platforms?"
- ii. How do teens' perceptions of privacy vary in the context of artificial intelligence applications and virtual reality experiences?

Research Construct Diagram

Current/Future Work

The background features a dark blue diagonal stripe running from the bottom-left towards the top-right. To the right of this stripe is a large tan-colored triangle that points towards the top-right corner of the image. The remaining area on the left is a light gray.
