EDUCATION

University of California, Berkeley | Master of Information Management and Systems

May 2026

- Focus Area: Applied Data Science & Machine Learning
- Relevant Coursework: Programming and Computation, Data Structures and Algorithms, Introduction to Data Structures and Analytics, Applied Machine Learning, Quantitative Research Methods for Information Systems and Management

University of Washington, Seattle | Bachelor of Science in Informatics

June 2024

- Focus Area: Data Science & Information Architecture
- Relevant Coursework: Information Analysis and Design, Advanced Methods in Data Science, Introduction to Information Architecture, Databases & Data Modeling, Computer Programming I & II.
- Honors & Leadership: Interdisciplinary Honors Program, Dean's List (5x), Brotherhood Initiative Scholar, National Society Black Engineers Member, Residential Advisor.

SKILLS

- **Programming Languages:** Python (pandas, numpy, matplotlib, etc), R (dplyr, tidyverse, ggplot2, etc), SQL, Java, HTML/CSS
- **Data Visualization Software & Modeling:** Power BI, Tableau, Alteryx, MS Excel
- **Data Warehouse & Management:** Azure, MySQL, NoSQL (MongoDB)

EXPERIENCES

Marketing & Data Analyst Intern | Russell Investments – Seattle, WA

June 2023 – Sep 2023

- Leveraged SQL and data visualizations to analyze website, social media, and digital channels, identifying customer trends that drove media engagement, presented to 50+ stakeholders, resulting in a 14% increase in website traffic.
- Conducted analysis of ESG survey data utilizing Excel, Alteryx, and PowerBI to create dashboards benchmarking the firm against competitors and identifying improvement areas, adopted by four teams and **presented to 100+ stakeholders**.

Research Data Analyst | iSchool Inclusion Institute of Information Sciences – Austin, TX/Remote

June 2022 – July 2023

- Led a four-person research team that collaborated digitally across time zones to develop a teen-centered privacy scale, addressing gaps in adult-focused privacy measures, **presented findings to 100+ research scholars** at the 2023 iConference.
- **Collected data from 50+ teens** to design a privacy scale tailored to their unique social media privacy concerns, aiming to enhance control features for teens and address the lack of focus on their specific privacy needs in existing platforms.

Data Science Summer Intern | Coastal Community Bank – Everett, WA

June 2021 – Sept 2021

- Leveraged SQL to collect comprehensive customer insights, crafting impactful Power BI visualizations that **identified pain points across 100+ companies** and directly informed strategic business decisions.
- Utilized Python's NumPy and Pandas to analyze historical ex-customer data, performing trend analysis to develop re-engagement strategies for new bank products, providing actionable insights to marketing and product teams.

TECHNICAL PROJECTS

AoA Web Redesign & Data Integration

Jan 2024 - June 2024

- Redeveloped the Alliance of Angels (AoA) website by integrating scattered data on a single platform and implementing a JavaScript-driven calendar feature that securely personalized event visibility for members and public users, while effectively managing login credentials and access controls.

Amazon Recommendation Engine

Sep 2023 - Dec 2023

- Developed an Amazon recommendation engine database by orchestrating a comprehensive design of an Entity-Relationship Diagram, executing ETL processes to implement stored procedures, synthetic transactions, and business rules, culminating in enhanced data retrieval efficiency and accuracy for millions of records.

Certifications

The Analytics Edge - MIT (www.edX.org) - In Progress

- Topics Covered: Linear Regression, Logistic Regression, Decision Trees, Random Forests, Text Analytics, Clustering, Data Visualizations, Linear Optimization, and Integer Optimization.
